

Objective

Detail-oriented and motivated individual seeking learning opportunities to apply and expand knowledge in Machine Learning, Artificial Intelligence, Data Analytics, and Software Development through hands-on projects and industry experience. Eager to continuously learn, contribute to innovative solutions, and grow professionally in a dynamic and challenging environment.

Area of Interest

- Artificial Intelligence, Machine Learning, Generative AI & Large Language Models (LLMs)
- Data Science & Analytics
- Software Development

Education

- **Bachelor of Technology in Artificial Intelligence and Data Science** |
Dr Mahalingam College of Engineering and Technology, Pollachi | 2023 - 2027 | CGPA till 6th Semester: 8.682 |
- **HSC** | Buds Matric/CBSE School, Oddanchatram | 2022 - 2023 | 93.8% |
- **SSLC** | Buds Matric/CBSE School, Oddanchatram | 2020 - 2021 |

Skills

Technical Skills

- **Programming Languages:** Java, Python
- **Libraries:** Pandas, Numpy, Matplotlib, Scikit-learn, XGBoost, LightGBM
- **Tools & Frameworks:** Power BI, Excel, n8n, TensorFlow, PyTorch, Keras
- **Database Management:** MySQL
- **Version Control:** Git & Github

Soft Skills

- Time Management
- Team Collaboration
- Leadership

Projects

Generative AI Interactive Storytelling Application

March 2025

- Built an AI-powered storytelling app using Ollama for real-time, prompt-driven story generation
- Implemented branching narrative logic with story flow control and input validation to deliver storytelling experiences

Deconstructing Blackbox football Analytics platform using XAI

December 2025

- Built football analytics models using XGBoost and LightGBM to predict xG, player value, and injury risk
- Applied SHAP and LIME for explainable insights within a scouting and performance analysis framework

Gas Price Forecasting & Storage Analytics

January 2026

- Developed a SARIMA-based time-series forecasting model to predict natural gas prices and project 12-month trends
- Built a storage contract valuation model with cash flow analysis and Streamlit visualization

Internships

TechVolt Software PVT.LTD - Data Science Intern, Coimbatore

June 2025

- Performed data preprocessing and exploratory data analysis on real-world datasets to improve data quality and modeling
- Developed data visualizations using Python libraries to identify trends, patterns, and insights

Certifications

- Completed AI for Students: Build your own Generative AI Model from Nxt WAVE
- Certified in NPTEL Online Certification on Soft Skills with Elite score of 67%

Achievements

- Participated in CodHer'25, a national-level hackathon promoting women in technology
- Participated in Flipkart Runway Season 5 from Unstop
- Recipient of the Proficiency Award for securing 3rd Rank during the Academic Year 2024-2025

Extracurricular Activities

- Collaborated with the college throwball team to achieve third place in the MCET TROPHY'25
- Placement Coordinator, Invictus - Led placement initiatives
